

Sept.24.20 ~ Transcript by Sam Mast

THOR HAN

Fall of the Deep State / Healing Codes / Rising frequency with sound / Planet shift into 5D / The new timeline transition / CERN / Music & the Nhor / Astrology / Pole shift / Metatron / Dreams.

Message

Thor Han: What do I have for you tonight is a nice message, that you are doing well in your evolution. If some of you don't know yet, you have passed the tipping point towards your good future timeline, where it will be a new world of peace and abundance. The times of troubles are not yet over, but you have passed this tipping point. The old future, if I may call it like this, the old future is resisting, it will resist for a while, but it is normal, it is a transition. The old future is dissolving, at the moment the heads have been removed, the heads in control, so now the anarchy of the minor leaders is leading the ancient timeline into mayhem and dissolution. This was for the third density news, as you know I will not say more because I do not want you to focus on this.

Q: *About healing codes and symbols, how energetic healing, numerology codes and symbols work:*

Thor Han: I can say that codes with numbers and geometry are working wonders to heal and modify the frequencies and the etheric fields. You can as well modify your consciousness and the way you are acting on the timeline. Numbers represent geometrical patterns. Sound and frequency are the same, you remember we have been talking about the Metatron symbol, this is geometry as well as consciousness as well as sound, this is the same with the numbers. Geometry and numbers are the same, you were speaking of the same thing, it is expressed differently. Visually or by numbers. At the moment you use a frequency higher than the matter itself, you must know what you are using because some frequencies are harmful or dissolving or creating chaos. Sound can elevate matter by rising the frequency, making it vibrating faster.

Q: *People are asking about the code 3731?*

Thor Han: Yes, this one is a re-harmonizing code, it works for pretty much all humanoid species, composed of liquid.

Q: *If the Lemurians reside in hollow Earth, is hollow earth different from Agartha?*

Thor Han: Your planet contains a hard core and around this a hard core you have rocks infusion but then under your surface there is a certain amount of miles where there are undergrounds, tunnels and cities, where a whole life populated by different ethnics and this is the Agarthan Kingdoms, it is hollowed in a way.

Q: *You've always had the ability of future insight.*

Thor Han: These are calculations we do and this is quite complicated, I wouldn't be able to explain to you all, it will take the whole night, but this is calculation we do and these are fixed calculations and there is a fluctuation around it, it's like a straight line and fluctuations around it, although you must think that time is not linear, every action you do now as a repercussion. I am going to talk about the measure of your time on Terra.

Four to five Terran days, and every time you modify the timeline, it is readable in the four or five following days. It is very easy to read,. Your actions have repercussion or resonance in the five days time of measure, we can see what is going to happen, we can see the timelines. At the moment it is pretty much stable and what we predicted is meant to happen. The light will rise again, so do not be worried, it will all be fine, be just patient and hopeful.

Q: The dark is working at keeping us down. Does it affect those statistical models and calculations that you do?

Thor Han: Yes of course but their actions are not very strong, they are less and less strong, so it affects of course the timeline but not enough to modify it in its core. So it is pretty much stable because your planet and all indigenous life forms on it are switching into a higher frequency, so this is a fact, it is not reversible. This is a timeline that is fixed. Then, on this timeline which is the core timeline, there are fluctuations around it and these fluctuations are the way you are going to get there. You choose the way you are going to get there; the hard way, the easy way, the fast way, the slow way, that is the fluctuation you choose. A new influence but the core of it is absolutely stable. The core of it is that you are going towards the path of your evolution and this is happening, it is positive, do not worry about that, it will be fine.

My thoughts about what is happening at the moment are very hopeful, I will never tell you about what is happening in the lower levels of your planet, the lower density, but I can tell you that what we foresee from where we are is absolutely wonderful. Being of a higher density, slightly higher than yours, a little bit in advance on you, we see things that you do not see with the eyes of your avatars. This is magnificent, we see colors around your planet that you do not see, it is iridescent, it is very colorful, and the magnetic grid is very beautiful, there are sore stains on this grid at the moment because there are wars and conflict, so we are rebalancing it, we are working with the help of the spirits and the old souls of Terra. So here is my view from above, from my station, I know you are all listening to me and I know your hearts are focused towards the stars, I would invite you to focus your attention inside you because you are the portal to the stars, you are all portals and all what you are looking for is inside you. Do not seek outside for the answers you have inside, you know everything, you can remember everything, you have this power that you have been told doesn't exist. These avatars of flesh you have incarnated into have abilities you have been told are pure fantasy, it is not, many of us from The Federation, The Council of Five and The Andromedan Council are helping your species, the Terran species to activate their potential. Not all abductions are bad, abductions performed by benevolent friends, relatives who look after your avatars, your bloodlines, this is the help we do without you knowing, we activate parts of your DNA that are asleep. You are children of the stars, all of you, not only by some beautiful souls inhabiting these avatars but these avatars themselves are products of the stars, mixed with the rocks and the soil of this planet.

Q: The CERN Machine, is it being used for good or not?

Thor Han: I cannot say it is used for bad, it is a neutral scientific experiment and many industrial from the military industrial complex tried to turn it at advantage, so it is not a bad thing at the start, but it is very, very well desired by some industrials and especially the military industrial complex, so no, it is not a bad thing at the start, but then it's very dangerous.

Q: *When will Myrah come back?*

Thor Han: She is occupied, there is a lot of work on the science station with the refugees and especially the hybrid children. They are taken care of, they have to remove all the implants, the trackers, and psychologically make sure that you will be able to be inserted and included in family cells on other worlds. First the health has to be checked, especially the trackers, and Myrah is very useful there because she is a specialist in all these things. She is not the only specialist, but she is needed, so this is not over yet. Maybe she will manage to have a break and one of these nights come and join me here, I haven't seen her either for a very long while.

Q: *How can we help other species in Terra to be ready for the new changes?*

Thor Han: By spreading awareness not to give into fear and conflict, by spreading awareness that everything that is generating fear or conflict against each other or even confusion, is to be ignored, this is the only way you will go forward in your evolution.

Q: *What kind of music do you listen to?*

Thor Han: I like to listen to Terran music that tells about my story, and when I like the lyrics, sometimes the rhythm but the lyrics must relate to something I feel for, and something that is relevant to my emotions. I like your David Bowie, I like his voice, I like his lyrics and his music also. He is special to me. I have specific tastes that are not shared with my colleagues, and some of my colleagues are very happy that I do not pilot with them anymore because I used to play this music in the ship and it wasn't pleasing everyone. The music I am talking about is the Terran music I particularly like, but this is not the only music I like. I like music from other places. There are people I deeply love for their music and arts: the Nhorrr. They create a music that is not only sound, but it is light and color. This music can shape your consciousness, can move matter, model soft matter like for instance water, clay or sand. They have a beautiful variety of multicolor sands on the planet, I have been there. I spent some time there once; these people use many different things to make music, such as minerals. The Nhorrr produce music through crystals mainly, but as well with the wind and the energies contained in the air, the sound produced by it is a modulation of frequencies, that is entrancing, hypnotic as you would say. I do like it. I told you about them already (*A Gift From The Stars*). There are many other cultures able to create such beautiful music. I like musics that modify my consciousness to a level where I feel bliss, when it carries me away on waves of sound and emotions.

Q: *How is astrology relevant as a system when you are in space?*

Thor Han: This is a very clever question and I would be very pleased to answer. Astrology is a science developed on many worlds, it is an indigenous science because when a people start to look at the stars they see patterns and cycles, they understand it influences, everything on their planet, every life forms, so that is how astrology always comes about. It is not only a belief, it is a science, it is fact. Everything influences everything else by gravity, even infinitely far gravity influences by resonance. Astrology affects all living forms on a planet but when you are in space, you cannot rely on it because you are moving, and when you reach the stage three of evolution which means the ability to inhabited flight out of your stellar system, astrology, you leave it on your planet. You do not take it with you because it doesn't make sense any more. Because you are travelling, and the influences are everywhere around you and every light year you just have a different set of influences, you cannot rely on it.

Astrology works only on the world you were born on, because that is where you were born and it is efficient there. Astrology is an influence, if you do not do any action, if you do not create your reality, astrology will be what will direct your actions and your feelings, but you can choose to let it only be an influence, something that will influence your actions if you decide to manifest your reality, you have the power, it will always influence you when you are on your planet, but you can choose to minimize the influence.

About the pole shift fear porn.

Thor Han: The pole shift is a slow process, it is a progressive process, there will not be a sudden shift; this will not be done in few months time, it has started a long time ago, and it will end probably far from now in time. We have many models of predictions, but we try to help it, make it slow and nice because we can control that, we cannot stop it or create it, this is a natural movement of your planet, it is like a breathing, it is a cycle, electromagnetic cycle, but we can alter it that it slows down, and it happens nicely, this is a part of the work we are doing on your grid, so you don't want it to happen suddenly, this would disrupt a lot and could be very harmful.

Q: Do any beings live on Venus?

Thor Han: They do, Venus was before a planet like Terra, very abundant with life. When it was found by the Federation it was a world with life, not yet at the level of Terra but there were many animals for instance. It was colonized first by Ummites and then the Altairan came, and they were thrown out. Then Lyrans came and as well people from the star system you call Vega and those from Vega stayed a long time, they created very important colonies. But then there was a war again, that thrown Venus out of orbit and created a world of chaos and fire. The whole climate changed, the gas and the atmosphere changed and became lethal, so all humanoid colonies left or migrated under the surface. In the sixth and seventh density of this planet, there is life, there are light beings that you do not have really contact with them, they are quite on their own, they are very special.

Q: Can more information be shared about the Horonga (Chupacabra)?

Thor Han: They are in service to the Orion forces.

Q: What about timeline shifts where you heal things that have happened in your past, and it shifts your future timeline?

Thor Han: Yes, it is very difficult to understand this when you are incarnated in an avatar of the third density because the brain doesn't allow this awareness, you need to step out of your avatar to be able to encompass the truth of this. Time is not linear, there is no past and there is no future, this is an illusion. This is very difficult to understand for you, I know. It will not change the timeline, it will change the way you ride this timeline, will you ride it in suffering, carrying wounds, or will you ride it with healed traumas and in peace, this can change the fluctuations around the timeline. You can indeed heal what has happened in the past emotionally by sending back intentions, and you can even travel backwards through your consciousness because you have an anchor point. Resonance works also with time. You can travel in the future by consciousness, you can travel in the past as well, so you are able to go into the past and meet your old self.

When you are younger you can have the visit of an old lady, of an old man in your dreams which is the future you, and this person will give you advices. You will wonder who is this person? This person looks like you but older, Is that a guide? Is that an ancestor? No it is just you. This happens, you can do this, you can go back because you have an anchor point, all you need is anchor points. What are anchor points: Memories loaded with the emotions are fantastic anchor points because you can really use them and go back there, and modify the emotion. You will not be able to modify the fact, the timeline, but you are able to modify the emotion.

I have been confronted to a lot of, things that, when I used to be a pilot in the war, affected me sometimes. But our way of dealing with it is by treating the flow of the emotion instantly. I have sometimes kept the emotion of sadness, frustration, anger for a few hours and this is very damaging. There is more work to do, but normally we do not need this. I was confronted to extreme situations that someone like you doesn't want to hear about, and this is more difficult to deal with, but we do that very naturally. We do not need to go very far in our past to heal traumas, maybe the farthest back we have to go is a few hours, because our nature is such that everything flows, and it is not like being incarnated in a third density matter. Anchor points, memories and projections for the future, this is the same, anchor points in the future that is how you create your future, you manifest it. Anchor points in the future create future memories, create memories in the future, manifest, when you are scared, when you have anxiety about something, you create an anchor point in the future because you think, *"oh, I am fearful that this will happen"*, you create an anchor point in the future. Manifest instead: *"I am sure that this will happen in the future, it will be wonderful, I can't wait to have this happening, I am so excited this is going to happen to me and I am going to be so happy, I just can't wait"*, this is a constructive anchor point that you put in your future and if you do it well, it may happen. This is what I was telling you from the start of this discussion, do not give into fear, frustration, anger, anything that is generating fear, leave it behind.

Q: Are you saying that we can visit our past and previous ourselves?

Thor Han: You can, not physically but by your consciousness, when you leave your avatar to come and visit us for instance or go to other places, for those who manage to do this is the same as these geographic transfers, these are temporal transfer, so you can as same travel to the past, the future, travel time, time is waves, it is a sphere made of waves. Difficult as well to explain, but there is no beginning and no end to time, it is not even a circle, it is a sphere, you stand in the center and wherever you look is the future and behind you is the past, but you move, and the sphere turns, all possibilities are around you, not a physical sphere I must be precise, it is all intellectual concepts which are real but to be apprehended with the mind and the soul. The mind has to do with it. Time is infinite, time is like Source, it's like life itself, it never started, it will never end. There is no start to the multiverse as it will have no end, it is only breathings and cycles like a spinning wheel.

Q: Can we be light beings at the same level of Metatron?

Thor Han: No, Metatron is not a light being, it is a consciousness, it is very different, if light being is a being that made of a light body, and it is of course conscious but Metatron is, it is very difficult to explain with your language because I need my language to explain this to you, my language carries visions, sounds and emotions that you do not receive.

So I need transcript with more words for you. Metatron is sound, vibration, it is the sound of Source, manifestation of the pattern, the key accessing Source. Metatron is conscious, it is a being but not of light, a being unlimited, interdimensional. Metatron is geometry, sound, vibration, consciousness, it is the access to Source, it is not a person.

Q: They've given it a name here, they call it Archangel Metatron.

Thor Han: They need words to explain concepts.

Q: Do you like earth literature?

Thor Han: I do not read literature on your planet because I do not have time for it, but I would like to because I read, I learn how to read your language and I would be interested, now that I have more time, would you advise me or anyone? Write literature and I will find it.

Q: What happens when we sleep and have dreams, what does our consciousness do?

Thor Han: Most of the time you dissociate from your avatar because your avatar releases some chemicals that enables your light being to be dislocated from your avatar, so it allows you to travel. There are normally many different levels of dreams and many causes, it can only be your mental state that needs to release some feelings of the day, some tensions, so you're subconscious, not your consciousness, your consciousness is linked to your light being, to your true self and your soul, your subconscious is linked with the brain of your avatar and all that it carries, and this will treat anything that is needed to be treated during the sleep phase of your brain and your mental state, this is one low level of dreams, this is only mechanism. Then you will know the difference when your consciousness slightly shifts out of your avatar, then you can travel and many things can happen.

Q: Some people have jobs at night when they go to sleep, they go do other things, and then they're exhausted in the morning, but don't remember.

Thor Han: You can do that. Forgetting this is due to the incarnation in the avatar, the avatars must be activated, that's why some of us work upon your species, with these species, if the avatar hasn't got all the codes activated you cannot remember. We are working hard, it is the difficult work to do, that is what is done when the avatars are being taken. I do not like to tell you the word "abduction" because it has a negative aura around it, so invited without knowing.
