### THOR HAN

#### Updates on the war and alliances with Inner Earth – Civilian contact speculations

**Q: *About the battle that is going on Earth, what is the latest information you have for us?***

**Thor Han:** I can give you information which does not disclose the topics of battles, I can tell you that alliances are being renewed between the Galactic Federation of Worlds and the Agarthan Kingdoms and the Telos Alliances. We are renewing our alliances with them, it is very difficult but once we will have complete alliances with all your underground people, it will be over for those we call the Dark Ones. So now, we are working on the diplomatic side to renew all the contacts with them. Before, on your planet, many different factions ruled and there were territorial conflicts; a great part of the ancient colonies went underground. I am talking about the end of your last ice age. Telosians betrayed, for a big part of them, they joined the Dark Alliances, but now we are renewing contact with them because they are losing their allies: the Ciakahrrs and the Orion Empire. The undergrounds of your planet are not yet cleansed in totality, but on the good side, once the diplomacy is done, it will work. I suppose it will be alright, I am not into diplomacy but in these times it is needed, so this is the battle update.

**Q: *You had mentioned something about initial contact with us sometime.***

**Thor Han:** This is unreliable because the timeline is changing; the war is not over, peace needs to be settled, and the chaos will end. We cannot make civilian contact openly, directly, when everything is in chaos, because the Terran people are not ready yet, they are being easily manipulated, and we need to remove all risks of new manipulations, we need to finish the clean-up beforehand. The contacts will happen in times of peace, not in times of battle.

**Q: *So as far as you see the current timeline, when do you see contact happening?***

**Thor Han:** This is difficult to tell but the latest, well with the best hopes 2023 summer, but this is not a fixed date.
