

THOR HAN
SOLAR SYSTEM UPDATES

You can tell them that the war on Mars is still going on, harder than ever. We are trying not to harm people, as much as possible evacuating prisoners, not yet the big evacuation because the Ciakahrrs and the Nebu are holding the facilities on Mars well.

The elites from Terra have not yet been evacuated. They are still hiding there in very deep underground facilities on Mars, under the main base Aries Prime. The resistance on Mars is also fighting well, having retreated for a while to adopt another plan, which I will not disclose. I cannot say more about what is going on Mars without disclosing our plans. Know that all the attention is now there. Still some attention is on Terra because the undergrounds have not been yet all evacuated; some deep underground spots. Many have been evacuated but the wrong side that you call dark or cabal, some are still there hiding, also, but we are nearly there, it is nearly over.

You need to hold on. They are telling you that it is not over, that this situation is definitive and that you have to comply with fear, of what they order you to do about your bodies. Do not, hold on. This will be soon over. It has taken more time than expected because the dark forces have allies and they fight well. We have started neutralizing the portals in this star system. I will not disclose the locations and the destinations, but we have found frequency keys to neutralize their access and activations. It is only a question of time, it is only a question of when, and I may repeat this to you that you have one job: raise your frequency.

Raise your consciousness, refuse fear. Tell them to go and see somewhere else. Good luck. You are fighting well, hearts high. The best way to help the Galactic Federation of Worlds' operations is to raise your hearts into a higher frequency, of inner peace and strength, because through inner peace you find your strength. The disturbance is there to divert your concentration upon finding the peace within. Distractions are millions around you. They try to separate you in groups, that you fight against each other, but this is not your way. Your way is unity within, in order to be unity with all the species. You are here on this planet performing this mission because you decided to come for this particular moment. We are very proud of you. The Galactic Federation of Worlds, the Andromeda Council, the Zenatean Alliance and the Council of Five are telling you that we are proud of you all. Keep up the good fight.
