

FIRST PLEIADEAN MESSAGE

April 13 2020

<https://www.youtube.com/watch?v=aEAeY86Ejic>

Thoran is the pilot who rescued me when I was nine years old, when I was at the time abducted by grey aliens. We kept since regular contacts, as he never stopped watching over my life.

Hello my name is Thor Han Eredyon and I am from Planet Erra. I decide to speak to you in order to bring a bit of understanding if needed . I warn you, I speak very simply with no emphasis. I am not a diplomat, I am not a high elder, I am just a pilot working at serving people and saving people from abductions I try keeping predators at bay with my team, and cleaning your mess sometimes. I call your planet Terra. I love it very much, it is a very beautiful planet. I may be speaking a bit bitter because I see what you are doing to it. I was born in your measure of space time 440 light-years from there. My planet orbits around a Sun system located in the constellation you named Pleiades.

It is not a constellation as you may know; it is a star cluster. It is a star dust cloud in which stars are forming. The stars are very young. We found two systems in it with very very young planets and we modified four of these planets. These planets were too young to receive life. The conditions were not fit for colonies. We fled our worlds that you can identify into the Lyra system because our worlds were attacked by a race of reptilians from a place in the sky your name Draconis. They have another name, equal the notion of evil. They destroyed everything, they took our worlds, we had to fled. survivors of this horrible event. We took back our worlds later, way later, but our colonies in Pleiades, Hyades and Vega were already settled. So I am a descendant of the Lyran colony. I am Lyran blood. Our planet is very beautiful, it evolves around a double star system, it is blue, bigger, one and a half times bigger than your planet Terra. It is very warm. The biodiversity is quite beautiful. We control birth rates then we can live in harmony with our environment.

I came here in a mission to help the Terran people as it is part of the Galactic Federation's program. I wanted to do my part of service for the greater good. Well, my job is consisting in saving people, mainly children. We cannot rescue everybody. It can be rewarded sometimes, but not all the time. We know what's happening, it is not very nice to hear, for you, but just know that you are not alone. You are not alone... We are doing our best. My main message is that you take care of your world, we do the rest. We take care of the sky. I love your planet very much, I love your people very much, and I wish you understand the preciousness of what you have.

They are 25,000 worlds in this galaxy with a civilization at the same height than yours, and beyond. You are those who have the chance to have rolled on a planet as beautiful as yours. Terra is very resilient, Terra is very resistant, but not your species. Take care, our brothers and sisters from Terra. I will end this message now and wish you awareness, comprehension, and kindness.
