### MYRAH

#### Ascension symptoms – Galactic Organizations

##### *Q: Do you know what the symptoms are of awakening?*

**Myrah:** Oh, it depends on the person's genetics, blood, on what stage of evolution you are, on your past lives and how clean you are in your energetic field. The symptoms are: a feeling of peace, the most common symptoms I suppose for you, well, for Terrans and those incarnated like you in Terran bodies, is that you do not care for anything else than peace and spreading wisdom. When you awaken to who you are, because you say, awakening, we need to be clear about this word, awakening to yourselves, awakening to your power, to your abilities, this is what is awakening, then it opens everything else. Awakening is about your true identity, if you are from an extra-Terran soul matrix you just discover it, then you explore your possibilities and what your mission is. If you are of Terran soul matrix, then you discover what is your true power as a Terran, as part of this beautiful planet and its diversity. You who hear me who are of Terran soul matrix, be proud because you are children at the center of the eye of the galaxy, we are all watching you awakening, a child passing into teenage-hood, maturity. All this is difficult, but this is how it changes, by the trial and the challenges, otherwise there's no change, it is not called change, it is called evolution, change is trial, it is being shocked, shaken, this is changed. So be proud. The symptoms of awakening are as simple as that; you awaken, you open your eyes, and you see. This is it.

There is no rule. No rule, everybody is doing it at its own pace and regard to the point of its evolution, to the clearance of the past traumas and the blood is coming in action too, so it is not the same thing, if you have the D protein it will be more difficult, the D protein has been added by the Anunakene to the type blood O which is extra-Terran blood, to make it compatible for hybridization with non Anunnaki, with Terran indigenous individual. O Annunaki blood and the other Terran bloods were not compatible, it was sterile, they create the protein to make the link and make the compatibility work but the D protein is taming down your frequency evolution, if you have it, it will be more difficult, it will be slower, it will be more painful, you cannot remove it, it's in your genes, so if you have the D protein this is difficult. It is easy to understand when you are D protein +, all your + is with D, you registered like this in your listing, you can be A, B, AB, O or minor blood groups, plus or negative, + is with the D, this won't help, it will make the evolution more difficult but will not stop it, this is what the Laans, the Lyran people tried to remove it and fought the Anunnaki for this because they wanted that Terran race to be free in their evolution.

##### *Q: The alien alliances and groups discussion.*

**Myrah:** I wanted to tell you about the different alliances because I hear there is a lot of confusion. I will start to speak about the good alliances and I then about the negative ones. The positive alliances who work for you are first the Galactic Federation of Worlds, this is us, we have many races involved, we are protecting peace and taking care that organic evolution on minor worlds are respected. We have more and more cultures joining all the time.

The High Council takes final decisions for the galaxy. You have first the ones from Selos, the Selosi, you have as well the Ashtar Command which is something that I will speak about later because it is very special, we have Vega, we have the Laan, Lyrans and the Carians which are descendant from the Lyrans, we have those from the Pleiades, we have as well the ones from Sirius - Ashkera and Thula, we have Tau Ceti and Andromeda, we have the Ummit from Nomu, and we have as well the Arcturians and Alpha Centauri, all these are deciding of the diplomacy of the peace in the galaxy, beside this big organization who wants only the good you have the Zenatean Council, you call it Andromeda Council, it is not the galaxy Andromeda, it is a star system in the Andromeda Constellation, there are 140 species involved, only selected in the highly spiritual developed species of this whole galaxy. They are looking after the energies and the shifts of spiritual evolution of all the different worlds in this galaxy, they are like wise elders if you want. There is another Council which is wise as well which was before called the Council of Nine which is now the Council of Five, it was created in the Orion area by all races before the Orion Empire, before everything. It was created by a race called Elmanuk. Now, they retired; they are nearly extinct. This Council is composed of five cultures which are the Ginvo, Orela, Emerther, Egaroth and Redan. These races are looking after peace in the galaxy; they are a cell of their own, although involved with us, the Galactic Federation of Worlds. What is different, and we do not agree with, is that they do not have the same rule of non-intervention as we do; they think that sometimes to help a world evolve they need to intervene in their evolution. We do not agree, but we work together because otherwise they will do without us and this is not good. We have as well something that looks alike the Galactic Federation of Worlds, it is called The Alliance or The United Alliance, The United World's Alliance, this was created in the Altair system, they are a group of humanoid races, mainly Akhori. The Akhori are very deceitful people, but they are in between, they are maintaining relationship with the Galactic Federation of Worlds but they as well maintain relationships with the Ciakahrr Empire and the corporate of Altair, which are not good groups. Everything that comes from Altair is not trustworthy. The Altairan humanoids mainly look all alike, with white hair. If you see someone with white hair be very careful, he may be from Altair, from Akhori.

We have also good people: the Orion League, centred on Alnilam and Meissa. The Orion League is not the Orion Collective. The Orion League is named also Black League. It was created by a collective of people from different worlds of the Orion zone, to fight the Orion Collective of Grays, the Origin Empire and the Alliance of The Six. The Orion Black League is an association of people, may I repeat, created to fight for their independence and protect the Orion Worlds against the rise of the Orion Empire of Grays, the Nebu, and the Gray Collective of Orion. I will speak about them later

The Vega Alliance is as well an alliance created by different races from the Vega systems to fight against the Orion Empire. I will tell you later about the Ashtar Command which is something very special. These are for the good groups. Now on the annoying side, there are more. I was talking about Ashtar, let's start like this. I would have a lot to say about Ashtar. Ashtar means "The Seat of Power". The Ashtar Collective and the Ashtar Galactic Command are two different things. Ashtar Collective is not good, Ashtar Galactic Command is good.

Now in details, the Ashtar Collective was created by an Alliance of people from the systems of Ashkera, Sirius A, and Thula, Sirius B, especially centred in Thula, on planet Mordha. Here are the headquarters of the Ashtar Collective, a collective created originally to fight against the creation of the Orion Nebu Empire. They wanted to keep their independence and protect the different species and biodiversity of all the worlds of the Ashkeran systems. Ashtar Collective was something very good at first, but the Nebu and Ciakahrrs infiltrated it rapidly. Now, the Ashtar Collective is a nest of snakes

You have The Alliance of The Six, the Grays and the Reptilians, they have all infiltrated The Ashtar Collective, and it is very poisonous, so the local populations rebelled and a faction separated from The Ashtar Collective, which was composed of humanoids from Thula systems, Sirius B, these humanoids created a cell, it was called a different name: Ashtar Galactic Command. They fled on the big ship that they enhanced afterwards in space, this is their home, the headquarters. It is a wandering ship, very big, they call it the mothership. They are roaming free, they are resistance, mercenary force, they are very skilled warriors, the best warriors, they have a very good organization and a very good army, so this is why we allied with them. They are not very numerous, they are a small group, but we integrated them as a fighting elite for our federation. The Ashtar Galactic Command although based in a ship has different outposts on different planets of different systems. They work on protecting your solar system, based on the planet you name Jupiter. They have a big, big, big facility on Jupiter; our officers are regularly referring to Jupiter, to Shar, the Galactic Command of Ashtar, to synchronize our plans and our agendas of military actions, Yes, Thor Han goes regularly to this Jupiter planet to synchronize actions. This is about the difference between the Ashtar Galactic Command and the Ashtar Collective.

I am very saddened to see and hear that many Terrans are channelling beings called Ashtar, they are manipulated, so be very careful. The Ashtar people are people from Sirius B, from where I come from, they look like me, they are human size of Terra with big eyes, triangular heads, they do not look like people from Erra in the Pleiades. Be very aware, this will make difference how do they look like, they are T-Ashkeru from Sirius B.

Now enough talking about these people, the big, big threat in this galaxy is The Ciakahrr Empire, the reptilians from Alpha Draconis. The Ciakahrrs are the elite lords, rulers, cast, but the biggest threat is the Nagai, the warrior caste located in the Thuban system in the Draconis Constellation as you name it. We do not have the same names. They terrorize the whole galaxy, you know that they have enemies that we are trying to find, if we manage to get allied with these enemies that they fear, that will be a good thing, but it is not yet negotiated, the name of these enemies are Negumak, they come from very far, but that is another story.

You have something on your planet, you call it Antartican Alliance, this is very, very, very nasty. The Ciakahrr Empire, the reptilian empire as you call it on your planet has created something you call Cabal and is in alliance with the American Government, I will tell you about it later. In Antarctica there is a group of very harmful Terrans, Nazi, they are from Germany, secret organization. There is a big complex of undergrounds under this continent Antarctica.

***Q: So is that the entrance to Middle Earth where that big hole is?***

**Myrah:** This is not the only entrance, it is one of them, you have the first outpost for the slaves to be evacuated towards your Moon and towards Tyr, Mars, and it's two artificial satellites, Antarctica is where the slaves are often gathered to be stood out of the planet by Maytra, Kiily-Tokurt, mainly it is their job.

***Q: There's something that people use constantly here on Earth, and it's called The Galactic Federation of Light, does that one exist?***

**Myrah:** No, The Galactic Federation of Worlds or The Galactic Federation most commonly called is a real entity, we work for balance and for the light of course, but we do not call ourselves like this.

***Q: We probably should be teaching people some pleiadian words.***

**Myrah:**

1. **Nadani** - Goodbye.
2. We have different notions to say, hello but the most common this may be one word, **Sha, Sha** is like Hi.
3. **Adonai** - resembles an old version of thank you, of being grateful for something.
4. The word for thank you is **D'nai**.
5. **Maa** - Love. This is the spiritual love, the universal love.
6. **Khore** - Peace.
