

**THOR HAN**  
**On Abductions**

***Q: What are the different reasons for why people get abducted?***

**Thor Han:** The different reasons are hybridization program, soul replacement at position of power, slave trade. There are two different stages of slaves, there are the sex slaves and a work force slaves, mainly, strong men are sent to your satellite, you call Moon and Tyr, Mars and its two satellites which are artificial; you name them Phobos and Deimos. We name them Tyr 1 and Tyr 2, this is for the work force on Tyr 1, and the Maytra bring the young women, fertile women for sex and hybridization trade. From Tyr 1 they are taken out of your solar system. What we can do is trying to stop the slave trade, what we are doing at the moment by our interventions for clearing the undergrounds of the planet, rescuing all those who have been taken. For those who have been taken to space, it is too late, we cannot do anything for them, but we act in the atmosphere of Terra, this is where our rights of protecting a civilization are effective.

***Q: Because of free will, do we need to start requesting assistance from the positive forces who are surrounding Earth, or will they just step in if need be?***

**Thor Han:** We hear you only if you have a connection with us. We are monitoring your atmosphere and checking out for activities. Abductions are performed cloaked, it is very difficult to spot them, but despite this fact we intercept a lot of them. It is a hard job, but we managed to intercept a lot, repair the rescued bodies and beam them back where they belong. We do not shoot at ships of course, but it happened to me once, and it was very disturbing, it was a mistake. We intercepted the ship, we gathered all the rescued slaves, repaired the wounded ones and send them back home. We have a way to know where they live by scanning their mind; we can always find where they come from. We have a problem of ethic with the children, we bring back the Terran children but the hybrid children that we intercept on other programs, we cannot beam them back on Terra because they do not belong to Terra. What would you do if you were abducted, inseminated, your fetus is taken out, for instance, it is a hybrid child with a Zeta or Ciakahrr or Naga or whatever race, this child is half yours, but you cannot take it back because this child will look different, and your kind will kill it, we know that, these hybrid children have no place on Terra, you're not ready, you're not tolerant enough, you're not open-minded enough to accept them. So these hybrid children are sent to different places to be taken care of and raised. The first outpost is the planet you call Jupiter, there is a great facility there where the children hybrids are welcomed. Many others are sent to different star systems to grow up and have a life, but they are first centralized on Jupiter. I have a lot to say about children.

***Q: Some people are woken up with bruises and they wonder where did this come from.***

**Thor Han:** Your species is evolving, your species is elevating in frequency and the more people are recovering their memory, the more the technology used by the Ciakahrr and Orion Empires is becoming obsolete. More and more, your people elevate genetically or in frequency, and they are able to remember because they are breaking the barrier of the third density plane, and they can remember because the memory is not erased, the memory is placed in another part of your brain, so you have to know how to access it. They may just have lost the connection, the memory of that moment in another part of the brain where it is hidden. You need to go and find it, the connection to the event that happened to you, and where it is stored in your brain. Normally it is severed but more and more people renew the connection and know how and where to find the memory. The memory cell as we say. Also hypnosis technique helps to renew the link to the memory cell.

In some undergrounds we have found very big storages the pods in which souls are stored. This is a very intricate and difficult operation to conduct because moving these pods is very dangerous, because they have a connection to a central and when it is disconnected we need to be very quick to transfer it to another central. This is a technology that is long to explain. We have found many, many, many of these pods, in these underground facilities. Do not think that most abductions for soul replacement and hybridization are done in space or in a ship; these are performed underground, under military bases. You have the biggest ones in North America and these ones are nearly cleaned up now, this is important.

**Q: *Have leaders of Russia, Putin, and Trump, replaced souls?***

**Thor Han:** No, they are original.

**Q: *How do these hybrid children come here when it's time, is it possible for them to come to people who are ready for them?***

**Thor Han:** It would true be in the best conditions but even if the parents are okay, the society is not, you do not live in a mature society, not mature enough to welcome these children, not now. The clearing of undergrounds has to be done before.

**Q: *They said there were many underground bases in Mexico City, inside the volcanoes, is that true?***

**Thor Han:** Yes, connecting to underground through the volcano there is actually, I think I remember there are two tunnels going in the undergrounds of two different facilities, where one has a spaceport and the other one is an experimentations facility.

**Q: *So for hybridization, who's doing the abduction?***

**Thor Han:** Concerning hybridization, there are diverse people doing that: the Ciakahrr Empire is the one you call reptilian from Alpha Draconis, which is Thuban. The Ciakahrrs are doing this to create a race of hybrid to be able to live on Terra. Orion: the Uru An Na Empire which is also called the Alliance of the Sixth or The Orion Collective, different names for the same thing, they're doing this in other parts of the galaxy to create hybrid races with super abilities, which they can control to colonize other worlds. As soldiers. It is as well genetic experimentations that they like to do, then you have hybridization.

The Altairan, the Akhori humanoids, they do this for creating as well a hybrid race. What they do with it, I am not sure, but they are taking them away from your solar system. There are the Xrog, from Zeta Reticuli as you name it, they are Grays, and grays are a reptiloid species genetically. They hybridize to create slave races as well, they like to experiment. I would keep these Alliances: Orion, Thuban, Zeta Reticuli Xrog and Akhori for hybridization. This is already a lot. Then we can think about other motives; the slave trades are led mainly by the Maytra, you do not want to meet them, they are very aggressive and hateful towards your species, well, towards many species. The Maytra do not come from your galaxy, they come from very far away, galaxy Megopei that you call Andromeda. Tall grays, you recognize them because they have a wrinkled face and bitter expression. They are a real plague in this galaxy. Equivalent to them are the Grails in Uru An Na, Orion. These are conducting abductions as well more sporadically, but the Maytra, they are on Tyr, your Mars, they have a facility on your satellite as well, Luna, that they share with the Kiily-Tokurt. Kiily-Tokurt...it is as well a whole story about them. Kiily-Tokurt have the black triangular ships that you see very often, they are very skilled in hiding themselves, Kiily-Tokurt are tall, white looking humanoids, like the Maytra but more humanoids, Tall white as you call them, they are not your friends either, they abduct for slave and especially sex slave trade, especially women and young females. Kiily-Tokurt go solo as do the Maytra. Reptiloids like to ally together, not the Grays.

Solipsi Rai are working for the Ciakahrrs Empire, then you have a whole hierarchy, the Solipsi Rai it is an interesting civilization, they come from a constellation you name Cygnus, they were a peaceful race, they look like small Grays type regarding your appellations. Solipsi Rai where a peaceful culture, they were enslaved by the Ciakahrrs very quickly, cloned, genetically altered, a core of them stayed on their planet, staying frightened but a lot of them have been enslaved and cloned, they are one of the biggest workforce for the Ciakahrrs. They are the ones who are working on the ships to perform abductions. They are more specialized in treating the abductors like removing their clothes or putting the implants or the trackers, doing the basic operations, the genetic operations are not often performed by them, they are performed by either the Kiily-Tokurt, Maytra or some Naga scientists, Naga are Reptiloids working for Ciakahrrs,

There is a species i am not talking about very much because they are discrete and few, they are victims of the Ciakahrrs and the Orion Empire, those you call Mantis. They are Tall Grays, but they have genetic particularities who make them look insectoids, they are tall and have the biggest eyes you've never seen and the triangular face, they do not come from your galaxy, it is another galaxy, M104 and they have a special mind, they do not have the same ethics, they do not see the problem of abducting people, they do not think it's bad. It is just for them only logical, physical scientific experiment, They work for Ciakahrr and Orion Empire, they are extremely talented scientists, they know everything about hybridization and life, how to create life, how to transform life, how to alter genes, they know that, and you will sometimes see them onboard ships performing the difficult tasks.

***Q: Who is abducting for food, and why don't they not eat animals instead of humans?***

**Thor Han:** Ciakahrrs. Reptiloids eat blood, fresh flesh, they do it also to animals. I believe humans are more tasty, especially young humans, children. Do you want me to continue this conversation?

**Q:** *No, not that part. We can stop right there.*

**Thor Han:** I am happy not to skip this topic as well.

**Q:** *Who has trackers, and who has implants because somehow they're finding these people, how do they originally place a tracker on someone?*

**Thor Han:** All right, a tracker is a device that will allow the people who abduct to find again the victim to continue the process. When it is hybridization, you always have a tracker that will permit to abduct again many times a same person, When you find a good subject you will keep on doing it with this subject, for instance a fertile woman, if she is a good subject for fertility they will abduct her so she has a tracker. They can monitor the development of the fetus and remove it when it is mature enough for removal, so the trackers serve for this.

They abduct subjects following bloodlines most of the time, because they have the right protein and the right blood, so hybridization works wonder. They take the subjects when they are small, just before sexual maturity, to modify the proteins. Then they start the process of transformation of the reproductive system to adapt it, to be ready to receive the egg. The tracker would allow monitoring the development and send a signal when the hormones in the host body is be ready to welcome the fertilized egg,

The tracker is a monitor, it sends a signal, and it is also done in a way that you cannot remove it with your technology or even see, because it is interdimensional technology; it is here but on another plane of density.

**Q:** *About soul replacement or slaves, how do they find those people?*

Soul replacement is about people who are useful for them. They will find people in the social positions they need, take the person and replace them. There are a few ways to replace a person, you can do a soul replacement if you need to keep the same body, you can clone the person, but this is a long process, this is when things are planned for a long time, for instance in royal families if you know who is going to reign, so you can afford to create a clone but for political people it happens very quickly when they come in power, so you need to do a soul replacement. This is a technique that is most commonly operated, then you can kill the person, if the soul replacement or the cloning is not possible, you kill the person and a shape-shifter will come instead. This is not the most common because shape-shifters it is very difficult to hold, and usually these people have families, and it is difficult for them to hide from the families, a shapeshifting lasts few hours, and they need to regenerate, regeneration lasts from seconds to minutes but during these seconds to minutes they have to hide, Adrenochrome helps a lot to maintain shapeshifting stable.

***Q: So when people get abducted to be put as slaves, do they abduct people specifically?***

**Thor Han:** It is random, they do not need their genetic material, they just need a workforce or a good-looking female, you know aesthetics has different standards on different worlds, they know the different standards of that will be required, so women abducted for slave trades are of all shapes, sizes, colors, good-looking in regard to where they are going to send them.

***Q: So then how can we protect ourselves from being abducted?***

**Thor Han:** Quartz enforces your energy field, and it is more difficult for you to be taken, but there are two things that are working, it is to erase fear, fear sends a signal of consenting, and the other thing is, when you know you have history of being abducted in your bloodline, you know it is going to happen to you, so then you can protect yourself. By erasing fears, and rising your vibration. There are some symbols who work, but just to make the work more difficult, the merkaba symbol that you all wear, works well to blind them. Those predators who need to go very fast and take a lot of abductees in one night will not bother with somebody who sends a high vibrational signal, but if they want you especially because they have a tracker in you, and they inseminated you, nothing will stop them. They will take you while you sleep because this is when you are vulnerable, they materialize in your house, I know you do not like to hear this, but there is not much you can do. This technology is above everything, you can help to cast them away, merkaba helps by enforcing your energy field and making you invisible, so they cannot feel your energy signature, this is the best but if they want you especially, they will try to get you, so merkaba protection works only for mass abductions. If you erase fear, it is best because fear as I said, sends a signal.

Raise your energy field, I know I will repeat myself but if you raise your energy field you energize your energy field, you vibrate stronger, and you make the manifestation in your mind to detect stranger objects in your energy field and body, you will feel a little slight tickling where the tracker is. You manifest the intention to know and to feel where the trackers are. You rise your frequency and you can feel the tickling, and then you can operate. Crystal quartz can act as an interdimensional device, the quartz has a very powerful ability to transpond densities, to connect with energies of different densities, lower or higher, especially higher, it will act like a surgical tool, and you need to jam the tracker by sending an impulse of energy of electric, magnetic, etheric energy whatever you can find and there are many ways, be careful, to do not electrocute yourself, do not use electricity I wouldn't recommend because there are stupid people on Terra.

***Q: Who are they who are they doing the cattle and animal mutilations?***

**Thor Han:** Mazarek, Grails, Kiily-Tokurt for the accounts often of Ciakahrs, but Mazarek especially, they eat animal parts but not only, there are other races who visit very, very rarely but Mazarek and Kiily-Tokurt are mainly doing this. Sometimes it happens that they just do experiments and I have to say myself, I don't know what they do. This is disgusting, it's disgusting, and it doesn't make any sense, they do that to humans as well, yes usually the

bodies are not found. All these people you have to know we try to get them. Everything that happens in the orbit of your planet is of our responsibility because we look after you, it is not our planet, it is not our civilization, but we have a duty of big brothers upon the sub-interstellar civilizations. We look after you and we try to track all these activities which are illegal, we do not have the right to interfere in the evolution of a planet in regard to medicine, sciences, genetics, technology, the civilization must go at its own pace, but we have the duty to protect any intrusion that are not from other worlds and that is when we come into action, we stop activities which are harmful for the civilization of the planet without interfering with the development of the planet, this is where the trick is, this is where our laws are coming into effect, we have a non-intervention rule that we apply.

***Q: So what they gain by cloning these people, are they mandated to clone themselves once they become part of the illuminati?***

**Thor Han:** Oh yes, many are agreeing for that and go on another planet, I am reluctant to speak about your celebrities because you are obsessed by them, they can agree, but sometimes they do not, they want to keep on having their life, these people have children, they want to stay with their children and see them growing, so they do not want to leave, so these ones are operated by force unfortunately, they are abducted either cloned, but clone as I told you it takes time to create a clone, clone is not working for instant replacement, otherwise soul replacement is the most common, and if they are cloned their original person as I told you go somewhere else, when they can have as they are offered a better life, which is not always the case. Wwe do not know where they go, but we are not very positive about Ciakahrr giving promises. The clones are being completely managed whatever they say whatever they do, they're monitored, it is biosynthetic life forms, clone with the DNA of the abductee, it is a copy if you want with artificial abilities which have an effect of enhancement if you prefer. Sometimes you see them in the videos that they melt down or literally just collapse, what's happening to them is that sometimes the Ciakahrr technology is not always wonderful and Ciakahrrs are very driven by their impulses, and sometimes they do not do things right, so the technology sometimes is not completely perfect, other monitoring has defect, we're dealing with a species which is driven by impulse, not wisdom. This is why they use Mantis to do the delicate, scientific job because they know it will be done well. Some people have been cloned more than once, they have clones kept in storage for replacement, when one of the clones have a defect as I said this technology is not completely perfect, so they keep them in storage in case it is needed.

***Q: Some people say that Atlantis was flooded because they were playing around with cloning, which is not entirely true.***

**Thor Han:** Oh, let me explain, flooding was done because there was a disaster resulting from a war, Atlantis was destroyed by the Anakh & Ciakahrr Empires, the flood was the result of a war, not because they were cloning. The colonies started to fight against each other for different motives, some turned bad, they turned towards greed and power, so the Ciakahrrs just stepped in, and it was a big chaos. Atlantis was the result of the end of a long period of territorial wars between different races on your planet, and this cataclysm put an end to all these civilizations,

these outposts, it was at the time very territorial. You had different factions from different worlds, The Galactic Federation of Worlds wasn't yet completely operational, so it was big mess on Terra.

***Q: Thank you for your service and have a good evening.***

**Thor Han:** Thank you, I have no evening or morning, you know where I am it is always dark. We have artificial light, but it is not the same, we try to reproduce the timeline of our different ethnicities on the station, but it is not easy, we have compartments with bio environments reproducing our respective worlds environments, natural environments and light and colors of light, but it is not the same, I was on Erra recently, and it was nice, it is my home in this life and I love it.
