### **THOR HAN**

*Underwater alien bases / Atlantis / Lemuria / Earth's second moon / the way dolphins and whales communicate / Nibiru fearpor narrative.*

**Q: Who has alien bases underwater on our planet?**

**Thor Han:** The underwater bases, they are not all with good intentions, there are a lot, I don't have the exact number, I think it is around about 150, maybe more, I do not have the right number but the Orion Alliance of The Six has really many bases in North Pacific, Mediterranean and Baltic Sea. The Gray Collective has bases in the Atlantic Ocean and Baltic Sea has one, Baltic Sea is a very strategic point, there is a portal there. The Ciakahrr Empire has two in the Atlantic Ocean and the one they have under Antarctica, yes, lake Vostok, this is a very big one. This is a very big problem. We are not aware of all of them. The Galactic Federation of Worlds has bases in the Atlantic, East and South Pacific. The North Pole as well.

**Q: Please explain for the humans of Terra how your crafts move through the water not affected by the pressure.**

**Thor Han:** We do use, in regard of our origins, more or less the same techniques. Around the shield of the ship there is a modified particle field; it creates a void that is moving with the ship and whatever the medium is, water, air or ether, it is always the same process. The void is created by a shifting of frequency around the ship and so in the water it is exactly the same. It creates when there is an atmosphere, sometimes, cloud condensation, but it depends on the weather, the temperature of the air, and it is the same with the water, it creates a sort of foam around the ship. The water doesn't affect the moving of the ship, so it can go just as fast in the water as it does in the air.

**Q: What is the reason for them to have the bases underwater?**

**Thor Han:** There are many reasons, The Galactic Federation of Worlds have bases to watch and survey the movements of all the other races present on your planet and as well monitor all the interactions between all the different groups. We have an important advantage regardless to which civilization is settling in your oceans; an amphibian race member of the Galactic Federation of Worlds. They are not relying on any structure and they can go unnoticed. The Purit Av-Illumu come from Mu Vela, they are as tall as average human and have resemblance to those you call the Tall Grays, but they are Amphibians. they have palmed hands and feet, and they have eyes with two layers of eyelids. They are very thin, they can breathe in water as well as in air but not the air that you breathe on your planet, a different air composition. However, your water suits them, that's why they are very helpful for monitoring emotions. We communicate with them telepathically.

The regressive races hold facilities for slaves, weaponry, spaceports, scientific experiments, same as their underground continental bases. It is linked mainly via the Agarthan web of tunnels, you can go from a continent to a base underwater to another continent. The Galactic Federation of Worlds doesn't have a connection to this web, it's a reason of security because

we do not want any interaction any enemy connected to our bases.

We all co-exist although we are enemies, it is because there are treaties, diplomacy comes in the way, I would say, "you know how I love diplomacy", I'd like to do it my ways, but I understand. The Galactic Federation of Worlds cannot afford an open war with together the Ciakahrrs Empire, the Orion Gray Collective and the Corporate of Altair, all these three together are bound by their own treaties, and we are not in as you can imagine, if we declare war to them, we are doomed, they are way more numerous than us, the war we may win it, but this will be terrible, we do not want this, we try to resolve all the conflicts in another way.

***Q: Can a Terran Astral Travel to those underwater bases?***

**Thor Han:** Yes, you can, but I wouldn't advise Astral Travel to the bases of the enemy, you would be trapped, you need to know where you go.

***Why do planes and ships get lost in the Bermuda triangle?***

**Thor Han:** Bermuda Triangle it is an interdimensional portal. You can set a direction to anywhere. This has been for a very long time a trap set up by the Ciakahrrs, to trap crews of planes and boats as you say, but now it has been closed and severely guarded, you will not have disappearances now noticed. You have six main portals on your planet; one in this triangle, another offshore China, one at each pole, one in North America and one in the Himalayas North of India. The higher mountains are natural portals, as part of the magnetic field of your planet.

***Q: Are there pyramids in the oceans?***

**Thor Han:** Yes, part of a very ancient civilization. There are plenty everywhere, ancient structures as well, some are a subject of war and conflict because they contain magnetic powers, tools, edifices and buildings, so yes there are pyramids under the sea. These pyramids and not only pyramids; other structures were part of an old age of your planet before it was covered by ice, when your species was still very primitive, and Terra was the ground of territorial conflicts between different races. These ancient civilizations were extraterrestrial colonies, such as Atlantis. There were other ones in the Pacific Oceans, but you have to know that the sea levels were lower than now, so the geography was completely different.

There have been pyramids on the continent of Mu, more looking like the Mexican ones. Lemuria was more ancient than Atlantis, they arrived first and there was a conflict so violent that it reshaped your planet. Selosians from Alpha Centauri, Laans from Lyra, Ahel colonies, Anunnaki and Ciakahrrs, they were all fighting for territories. Some turned bad using genetics to interbreed DNA of species who must not be interbreeding; animals and humans. They were playing with genetics and this had to stop, it wasn't the only reason for the destruction of all these civilizations, there were conflicts of power for the ownership of your planet. There have been so many layers of invasions in the history of your planet, this is a long story.

***Q: What civilization was before Lemuria?***

**Thor Han:** There weren't a special civilization, there were different colonies, civilization is something that is really settled and becomes part of the history of the planet. Colonies are

temporary settlements.

**Q: *Was Lemuria as far as we know covered by water in a flood?***

**Thor Han:** Yes and the end of the glaciation was accelerated, so the levels of the sea went raised faster and higher, glaciation ends through millennia, sometimes it's a very slow process, but this had been accelerated. The climate of Terra is being manipulated by your corporations to fit their financial goals and your planet has been really, really damaged, the climate is really manipulated and altered, this is saddening to see this because your planet has such a rich biodiversity, and it is a real shame and pity that your corporations are damaging it,

**Q: *Do tsunamis and hurricanes have anything to do with the aliens in the ocean?***

**Thor Han:** They are natural phenomena, but they can be triggered by anyone or anything, it is a natural phenomenon, part of your dynamics of air currents and climate.

**Q: *Could we use seawater as a fuel source?***

**Thor Han:** Yes you can, you can use it as fuel for engines if you want, this works very well because you have minerals and salt in it which can use electrical current, very conductive.

**Q: *Are there any crystals underwater that might not be available on land?***

**Thor Han:** No, it is the same geology that you have, and the water seas are the same planet ground, so crystals underwater do not stay crystals for a long time, they're very well eroded very quickly, especially in the oceanic ground with the pressures there will be exploded, crushed.

**Q: *Are there any oceans connected to any freshwater bodies of water?***

**Thor Han:** I know there are many rivers under your oceans, and you will be surprised of the web of unsalted rivers running under your oceans, because you have springs coming from the Earth under the level of the oceans, and it flows, and it has to come out, that water wouldn't immediately mix with this ocean water because of the difference of temperature makes them stay compact, eventually they cool down, and they finish by dissolving into the ocean. When they come out of the spring from the crack in the Earth they are warmer, and they keep their shape for quite a long time. They dissolve because they cool down, this is how it works. It is occurring everywhere.

**Q: *How many times has our planet been destroyed by water and why?***

**Thor Han:** Four times to my knowledge. The reasons, old war and acceleration of the melting of the ice. You had a second satellite and this one was destroyed, this happened a very long ago. You had two moons. You know you have two moons again, you have a little ridiculous rock that your Terra captured in its gravity, we call it the ridiculous rock because we have to joke about it. We love rocks and this one is very cute, it is your second Moon, a few miles' diameter only, your planet captured it very recently in its orbit. You cannot see it in your bare eyes because it is so tiny, it barely reflects the light of your star.

**Q: *Well I know that people keep talking about some planet Nibiru.***

**Thor Han:** I have been concerned that many people are very scared of it, Nibiru is in another density, and it is not here, it cannot crush onto your planet. This is part of the manipulation of

your elites, when all the false predictions will have been uncovered, they want everyone to stop believing in everything, in our help, in their own ascension, in everything, they are manipulating your medias, infiltrate all the future groups and spread false predictions and scare people, and by scaring people they bind their minds and then when the fake predictions will be wrong everybody will turn their back, and they will have won, so be very careful.

***Q: Do you remember the Japanese tsunami that killed hundreds of thousands of people, so they're still radioactive material going into the waters from Japan that has not been fixed.***

**Thor Han:** I can look at the data of the history of your planet. The nuclear plant, we have avoided you a tremendous catastrophe, the plant is secured, but there has been a huge loss into the water of the Pacific Ocean. Power plant now is not a problem, it's not a threat anymore, but pollution has made damages before we could intervene to stop the problem, this should have been exploding if we hadn't intervened. Do you know how many power plants we have avoided exploding? You have no idea, you must stop with these stupid power plants, this is enough now, time is revoluted, you don't need this kind of energies, energy is free on your planet, it is free and the elites, they know it is free, and they don't want it to be free, but it will be free soon. It will be a new world for you, we can't wait as well because it will haste and accelerate the moment when you will be able to join us, but you must first make your proof that you are not a threat for the galactic peace because at the moment you are.

***Q: Right, but that could be because we have the reptilians, but once the reptilians are gone then I could see that happening.***

**Thor Han:** All your secret societies will collapse one by one without their support, once they are gone it will be very easy for us to help you but as long as they are here we cannot afford an open war with them, warfare in the undergrounds it is fine, it is a different way of fighting that you know on your planet, but this is our way of doing.

***Q: Does Erra have marine life like sharks and whales?***

**Thor Han:** We do not have the same sea mammals as in Terra, they are different, we have big ones like your whales, of course they look different, they are beautiful, we can communicate with them telepathically . Everyone communicates telepathically and there are such a biodiversity on my world, the marine life is absolutely stunning, there are species which are half vegetal half animal, the bioluminescence is more developed than on your Terra because the composition of the water is slightly different and the light of our Sun is as well composed of different atomic structure. The marine life is absolutely beautiful, I cannot name all the species, there are millions of different species, in rivers, ponds, seas, oceans. We can telepathically communicate with sea life even here on Earth, it is a different language, an emotion language.

***Q: Are you communicating with just like sea animals, or can you communicate with jellyfish for example or seaweed?***

**Thor Han:** No, Jellyfish have no brain, they are so primitive but wonderful creatures, we can communicate by electrical impulsion, electric is a term that we do not use, it is a term that you use, and I refer to it because it makes sense for you, by impulsion of energies.

**Q: So as you know, right now our oceans are full of radiation from the Japan thing and full of plastic, so do you think it's good to eat anything from the ocean right now?**

**Thor Han:** This is a difficult answer to give because I wouldn't advise eating any other creature with flesh, but if you want to eat other creatures with flesh because it is your choice and your body can take it, then you need to be very careful where you prey or hunt, fish in your oceans are contaminated with substances in the Pacific Ocean, this is very difficult, especially in the west of the Pacific Ocean but then there are parts on Terra which are clean and clear.

**Q: Really? Where is this?**

**Thor Han:** I should show you a map, but I know for sure in the Southern Hemisphere of your planet, this is all regarding the currents, next to the tip of continents like South America, South Africa, in the northern seas, next to the poles, all the water becomes a little bit fresher, because of the ice melting occurrence, the acidity of the water is different.

**Q: Would you say that dolphins and whales have consciousness that is similar to humans?**

**Thor Han:** Very near, very close indeed especially dolphins, they are a species quite evolved spiritually and energetically, yes, they have such an influence on the grid of the planet that would surprise you because of their abilities, hope you will discover it one day, resonance linking, they can link to each other by resonance regardless to the distance and when they do that they, I would say getting resonance with the grid of the planet as well, it is a specific phenomenon of communication, quantum you can call it, but I would say more resonance, they use sonar as well for shorter distances, they have a collective consciousness, the waves not the dolphins, the whales are the collective consciousness and some species of birds have these two, but the waves are very evolved mammal in your Terra and yes they influence the grid of your planet very positively.

### **Message**

**Thor Han:** I know I will not repeat it enough, keep your vibration high, I know there are a lot of misinformation on your internet, please do not believe everything, do not believe everything that is scary, do not as well believe everything that is too wonderful, believe your own instinct, we were talking about Nibiru, many people are scared that a Nibiru planet would crush on Terra, but it will not, it is not of the same density and it is not a planet, so this has to be forgotten. I have heard as well about Ashtar, you have to stop believing everything about the Ashtars, there is a trap of manipulation, many people are being manipulated, and they do not know mind control, mind manipulation, you must believe only what makes sense to you, and what feels right. And keep hope, step back, do not take part in any guerrilla, conflict or warfare opposing two factions of your species, you need to unite as the same species, as one, otherwise you will never get there to federate, how do you want to join the Galactic Federation of Worlds if your world is not federated, if your world is thorn by Terran wars, if the other members of your species are subject of hate because they dress differently, speak differently, think differently, how do you want to join a Federation which is galactic? This doesn't make sense, you need first to be united as a single species which you are, then your elites will not have power any more.

You know who you are, you all know, and I am talking to the Terrans, the real Terrans, not the envoys incarnated in Terran bodies, the real Terran souls. We are here for you, we are going through all this trouble for you, risking our lives, spending our time and our efforts to help you get rid of the threat of some empires who have agendas for your planet. Some species have foreseen your future and haven't liked what they see, so we are now in time here because it is the tipping point for the Terran species, human species, well, you have two roads, the road of spiritual ascension, unity and federation or the road of a terrible, terrible time of dictatorship and war, where all Terran humans will be submitted and assimilated as machines, like possessed. They will lose their souls, but this is what we want to avoid, so I would not disclose what is in our plans, but I can tell you this, the good road has already been taken, you are walking on the good road now, the road of the spiritual ascension, this is all you have to know, you're just on this road, and you can go back and take the other one, or keep on walking ahead, looking at the light in front of you, looking at the hope, visualizing your planet as a planet surrounded by light, more powerful than ever, you are already in the new chapter of your revolution, you're just finishing cleansing your house, this is what I wanted to say.

*Q: I want you to give me four new words, Pleiadian words, so that we can teach people.*

**Thor Han:** This is always awkward to pick words in my language.

1. **Hu** - Son.
2. **Shan** - World.
3. **Sh,ana** - Civilization.
4. **Haya** - Daughter.
5. **Mana** - Mother.
5. **Ban** or **bany** - friend. It depends on, let us say, my people say bany, Taal say beny.
